

Amendment to Serial No. 09/963,720  
Confirmation Number 9296  
September 26, 2001  
Page 2 of 11 pages

~~wherein the connector is adapted to be removably connected to at least one other connector by an ultrasonic weld.~~

15. (Amended) A connector device adapted to be used with an electrical cabling, said device comprising:

~~a first connector having a housing and opposing sides; and~~

~~a second connector having a housing and opposing sides;~~

~~wherein at least one of said opposing sides of said first connector is removably connected to one of said sides of said second connector.~~

Please insert new claim 29 as follows:

29. (New) A connector comprising:

~~a housing defining an interior channel and having two opposing sides; and~~

~~a crimping device movably positioned inside said housing and adapted to secure at least one electrical cable in said channel;~~

~~wherein the connector is adapted to be connected to at least one other connector.~~
